1.0 PURPOSE

AAM is dedicated to the protection and conservation of the environment. We are helping to ensure a green future through social responsibility, global compliance, and the reduction of energy use, waste and pollution.

2.0 SCOPE

This policy applies to all global AAM facilities, subsidiaries, suppliers, and contractors.

3.0 REFERENCES

3.1 ISO 14001-2015

4.0 RESPONSIBILITIES

- 4.1 Business Unit Presidents, Plant Managers, and Environmental Managers are responsible for the implementation of environmental programs that adhere to this Environmental Policy.
- 4.2 All associates have a role and are required to openly communicate and actively collaborate with other associates to ensure the protection and conservation of the environment.

5.0 GENERAL

5.1 DEFINITIONS

EMS – Environmental Management System – includes a set of Level 1 & 2 procedures designed to provide the necessary framework to establish environmental systems at AAM facilities in order to meet requirements of the Environmental Policy Statement and the ISO 14001:2015 standard.

It is the responsibility of the holder of this document to verify the latest revision. The latest revision of this policy is controlled and published electronically on the AAM Portal (under Policies and Procedures) and on the EH&S SharePoint site. All other copies are considered uncontrolled. To view the latest revisions to this document, see the Revision History section of this document.

6.0 POLICY

AAM is dedicated to the protection and conservation of the environment. We are helping to ensure a green future through social responsibility, global compliance, and the reduction of energy use, waste, and pollution.

This policy applies to all global AAM facilities, subsidiaries, suppliers, and contractors.

The key points of this commitment include:

- Strive toward continuous improvement of our environmental performance through the establishment of environmental objectives and other key metrics.
- Ensure compliance with applicable environmental rules, regulations and laws in all countries where we do business through monitoring and auditing programs.
- Incorporate pollution prevention practices to properly control, minimize or eliminate regulated substances from our water discharges, air emissions and solid waste disposal by applying responsible chemical management.
- Reduce waste through source reduction, re-use, and cost-effective recycling programs.
- Utilize technology, behaviors and engineering practices to reduce environmental risks and impacts to our operations.
- Foster open communication with our associates, communities where do business, and other interested parties regarding our environmental performance.

7.0 ACCOUNTABILITY

- 7.1 Business Unit Presidents, Plant Managers, and Environmental Managers are responsible for the implementation of environmental programs that adhere to the Environmental Policy.

It is the responsibility of the holder of this document to verify the latest revision. The latest revision of this policy is controlled and published electronically on the AAM Portal (under Policies and Procedures) and on the EH&S SharePoint site.
