

March 2023 Investor Presentation

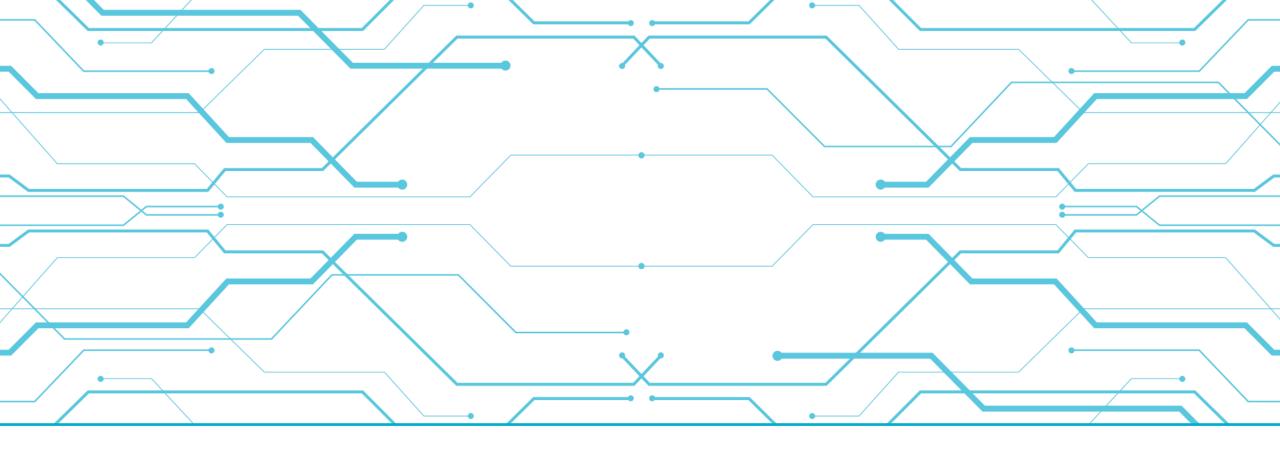

BRINGING THE FUTURE

Forward-Looking Statements

This presentation information contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements involve certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied by these statements. These risks and uncertainties include factors detailed in the reports we file with the SEC, including those described under "Risk Factors" in our most recent Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q. These forward-looking statements speak only as of the date of this communication. We expressly disclaim any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement contained herein to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

It should also be noted that this information contains certain financial measures, including Adjusted EBITDA, Adjusted Earnings per Share, Adjusted Free Cash Flow, Net Leverage Ratio and Liquidity that are not required by, or presented in accordance with, accounting principles generally accepted in the United States, or GAAP. These measures are presented here to provide additional useful measurements to review our operations, provide transparency to investors and enable period-to-period comparability of financial performance. A description of non-GAAP financial measures that we use to evaluate our operations and financial performance, and reconciliation of these non-GAAP financial measures to the most directly comparable financial measures calculated and reported in accordance with GAAP, can be found in the appendix under "Reconciliation of Non-GAAP Measures."

AAM Overview

AAM - Quick Facts

Global-leader in design, engineering and manufacturing of automotive propulsion systems and technologies to support electric, hybrid and ICE vehicles

\$5.8B 2022 Revenue

~19,000 Employees

18 Countries

Over 80 Locations

14 Global Engineering and Tech Centers

DRIVELINE

- One of the leaders in hybrid and electric driveline solutions
- A Global Leader in
 - Full-size Pickup Truck and SUV Driveline Systems
 - AWD Systems for Crossover Vehicles
 - Damped Gears, Viscous
 Dampers and Rubber
 Isolation Pulleys
- Pioneer of Disconnecting AWD Systems

METAL FORMING

- Strong position in electrified propulsion components
- Leading automotive forger in the world
- A Global Leader in
 - Forged Gears & Shafts
 - CVT Pulleys
 - Powdered Metal Connecting Rods
 - Aluminum Valve Bodies
 - Machined Helical Gears
 - Differential Assemblies

2022 AAM Highlights

BRINGING THE FUTURE

AAM electric drive unit powers Mercedes-AMG GT 63 S E PERFORMANCE

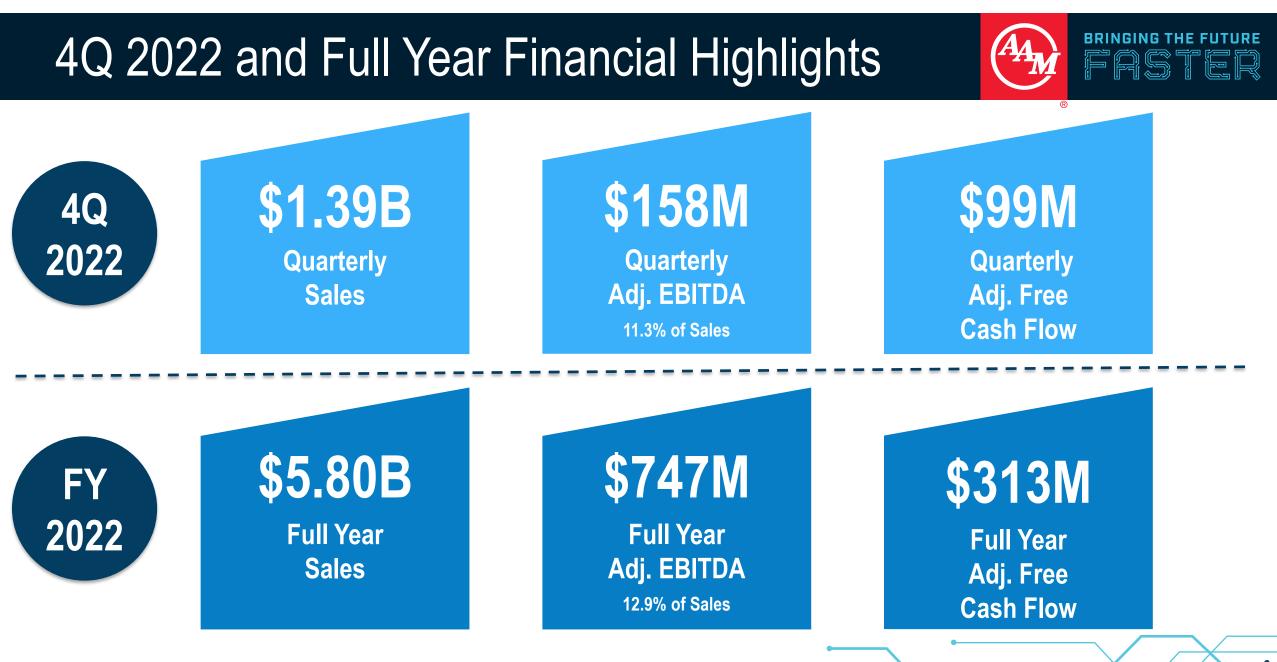

Announced contracts valued at more than \$10 billion for nextgen full-size truck axle programs with multiple customers

Recognized as an Overdrive Award winner at General Motors' 30th annual Supplier of the Year awards

	Awarded multiple contracts to supply major global OEMs with electric components for electric drive units		AAM is the new axle supplier for GM's next generation Colorado and Canyon (debut in model year 2023)	Forbes 2022 AMERICA'S BESTLARGE EMPLOYERS	Named to Forbes' list of America's Best Large Employers
Automotive News PACE PACE AWARD 2022 WINNER	AAM Recognized with Three PACE Awards for Innovative EV Technology	текгог	Acquisition of Tekfor to provide synergies, diversify sales mix and increase electrification product portfolio		2021 Sustainability Report expanded commitment to net zero emissions by 2040

* For definitions of Adjusted EBITDA and Adjusted Free Cash Flow and non-GAAP reconciliations, please see the attached appendix.

Business Update

Jupiter Electric Mobility

Jupiter Electric Mobility sourced their 1st E- Beam axle for the 2.2T Battery Electric Light Commercial vehicle from AAM. Jupiter Electric Mobility Pvt. Ltd. is an electric vehicle & technology company and a subsidiary of Jupiter Wagons Limited a manufacturer of railcars, commercial and heavy vehicles, and marine containers.

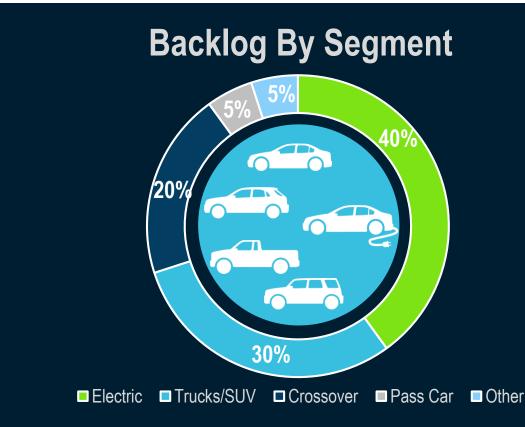

ELECTRIC SUV Program

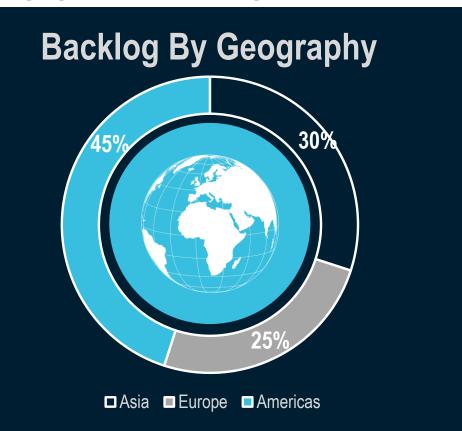

AAM to supply TracRite Electronic Locking Differentials for a new model year 2024 Electric SUV program, providing superior traction and fully synchronized e4WD propulsion.

Gross New Business Backlog (disclosed on January 4, 2023)

BRINGING THE FUTURE

\$725 Million Backlog (2023-2025)

Electrification continues to be a growing portion of AAM's new business backlog

2023 Financial Outlook (as of February 17, 2023)

9

2023 Financial Targets

Full Year Sales\$5.95Adjusted EBITDA\$725Adjusted Free Cash Flow\$225

\$5.95 to \$6.25 billion

\$725 to \$800 million

\$225 to \$300 million

- These targets are based on North American light vehicle production range of 14.5 15.1 million units, current customer production and launch schedules and business environment
- Adjusted Free Cash Flow target assumes capital spending in the range of 3.5% 4.0% of sales
- AAM expects restructuring and acquisition-related cash payments to be between \$20 and \$30 million

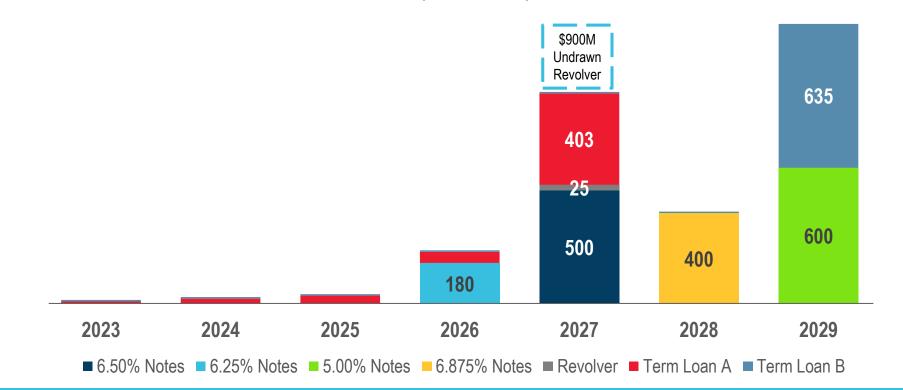

Debt Maturity

R

Senior Debt Maturities at 12/31/2022

(in \$ millions)

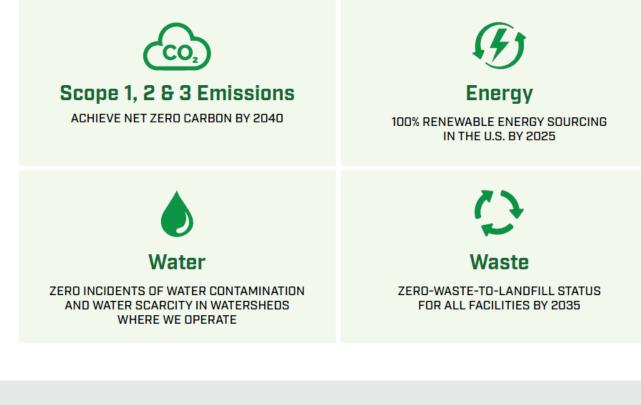

Weighted Average Maturity of Senior Debt: 5.5 years

Source: This data is as of December 31, 2022 and reflects the Term Loan B refinancing completed in December 2022.

Sustainability Initiatives

New Targets

- We are focused on achieving profitable growth and doing so sustainably.
- We initially set goals to reduce GHG emissions, energy usage, and water consumption by 5% by the end of 2024.
- AAM achieved those goals ahead of schedule.
- We established new targets to guide AAM's global environmental sustainability initiatives.
- We have been approved for our Science Based Targets initiative (SBTi) accreditation of our climate goals.

Launch

AAM's Addressable Electric Vehicle Market

AAM anticipates the addressable sourcing market at \$20-\$30 billion by 2030*

- This includes full systems, subsystems and components
- We offer solutions for various OEM go-tomarket strategies for electric vehicles
- Our technology is a key differentiator
- AAM expects to achieve a strong position in the global electric-beam axle segment
- We expect the market to grow past 2030

Addressable Market Opportunity

2030 Electrification Market Share Goal

BRINGING THE FUTURE

Heritage of quality, technology leadership and operational excellence.

Broad geographical footprint supports market share growth in Asia and Europe while maintaining strong NA position.

Target >10% Share Of Our Estimated Addressable Market By 2030

Combined with a strong foundational ICE business, AAM revenues have opportunity to grow through 2030 Similar outsourcing dynamics between our legacy and electrification business. Legacy market share > 10%. Robust innovative product platform serving multiple vehicle segments.

Broad portfolio in electric drives (including e-beam axles) and components allow for full participation in OEM sourcing strategies.

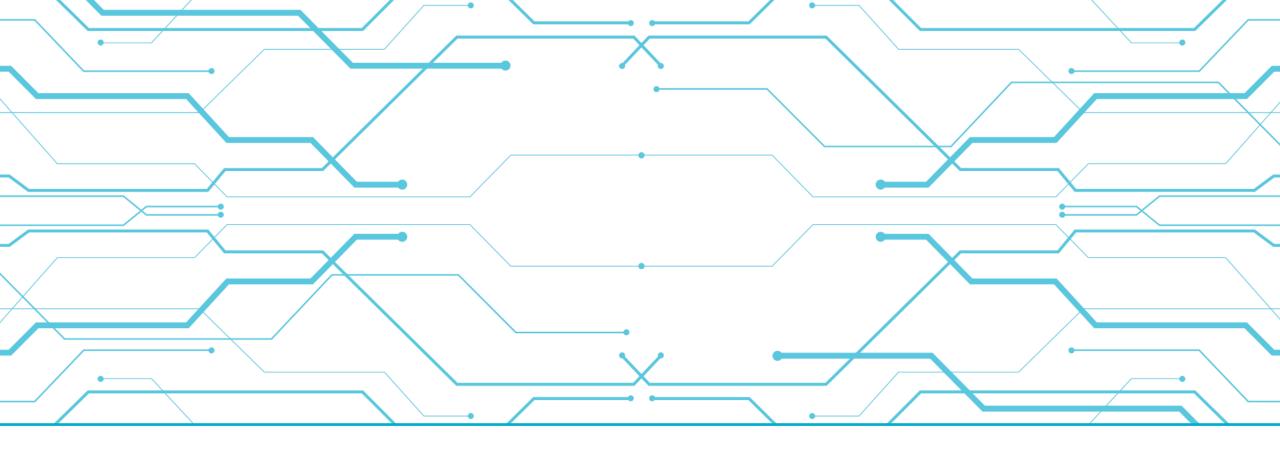

Higher outsourcing probability and share opportunity for e-beam axles.

17

AAM Long-Term Value Creation

Diversification	 Balanced mix of customers and geography. Expand our product portfolio, driving opportunities with new OEMs and regions. Agnostic to propulsion market changes.
Sales	 Grow above market by leveraging scale and technology. Electrification will further drive expansion into new segments. Protect and extend the core business. Offer a compelling value proposition to customers.
Financials	 Leverage AAM's Operating Systems to drive top tier EBITDA margin and cash flow generation. Enhance balance sheet strength.
Long-Term Focus	 Leader in electric propulsion technology. Increase size and scale through organic and inorganic growth. Effective deployment of capital.

In addition to the results reported in accordance with accounting principles generally accepted in the United States of America (GAAP) included within this presentation, we have provided certain information, which includes non-GAAP financial measures. Such information is reconciled to its closest GAAP measure in accordance with Securities and Exchange Commission rules and is included in the following slides.

Certain of the forward-looking financial measures included in this earnings release are provided on a non-GAAP basis. A reconciliation of non-GAAP forward-looking financial measures to the most directly comparable forward-looking financial measures calculated and presented in accordance with GAAP has been provided. The amounts in these reconciliations are based on our current estimates and actual results may differ materially from these forward-looking estimates for many reasons, including potential event driven transactional and other non-core operating items and their related effects in any future period, the magnitude of which may be significant.

Definition of Non-GAAP Measures

EBITDA and Adjusted EBITDA

We define EBITDA to be earnings before interest expense, income taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA excluding the impact of restructuring and acquisition-related costs, debt refinancing and redemption costs, loss on sale of a business, impairment charges, pension settlements, unrealized gains or losses on equity securities and non-recurring items. We believe that EBITDA and Adjusted EBITDA are meaningful measures of performance as they are commonly utilized by management and investors to analyze operating performance and entity valuation. Our management, the investment community and the banking institutions routinely use EBITDA and Adjusted EBITDA, together with other measures, to measure our operating performance relative to other Tier 1 automotive suppliers. We also use Segment Adjusted EBITDA as the measure of earnings to assess the performance of each segment and determine the resources to be allocated to the segments. EBITDA and Adjusted EBITDA are also key metrics used in our calculation of incentive compensation. EBITDA and Adjusted EBITDA should not be construed as income from operations, net income or cash flow from operating activities as determined under GAAP. Other companies may calculate EBITDA and Adjusted EBITDA differently.

Adjusted Earnings Per Share

We define Adjusted earnings per share to be diluted earnings per share excluding the impact of restructuring and acquisition-related costs, debt refinancing and redemption costs, loss on sale of a business, impairment charges, pension settlements, certain accelerated depreciation, unrealized gains or losses on equity securities and non-recurring items, including the tax effect thereon. We believe Adjusted earnings per share is a meaningful measure as it is commonly utilized by management and investors in assessing ongoing financial performance that provides improved comparability between periods through the exclusion of certain items that management believes are not indicative of core operating performance and which may obscure underlying business results and trends. Other companies may calculate Adjusted earnings per share differently.

Free Cash Flow and Adjusted Free Cash Flow

We define free cash flow to be net cash provided by operating activities less capital expenditures net of proceeds from the sale of property, plant and equipment. Adjusted free cash flow is defined as free cash flow excluding the impact of cash payments for restructuring and acquisition-related costs and cash payments related to the Malvern fire, including payments for capital expenditures, net of recoveries. We believe free cash flow and Adjusted free cash flow are meaningful measures as they are commonly utilized by management and investors to assess our ability to generate cash flow from business operations to repay debt and return capital to our stockholders. Free cash flow and Adjusted free cash flow are also key metrics used in our calculation of incentive compensation. Other companies may calculate free cash flow and Adjusted free cash flow differently.

Net Debt and Net Leverage Ratio

We define net debt to be total debt, net less cash and cash equivalents. We define Net Leverage Ratio to be net debt divided by the trailing 12 months of Adjusted EBITDA. We believe that Net Leverage Ratio is a meaningful measure of financial condition as it is commonly used by management, investors and creditors to assess capital structure risk. Other companies may calculate Net Leverage Ratio differently.

Liquidity

We define Liquidity as cash on hand plus amounts available on our revolving credit facility and foreign credit facilities.

US SAAR

We define US SAAR as the seasonally adjusted annual rate of light vehicle sales in the United States.

Accelerated Depreciation

In the first quarter of 2021, one of our largest customers announced their intention to cease production operations in Brazil in 2021 as part of their restructuring actions. As such, we accelerated depreciation on certain property, plant and equipment beginning in the first quarter of 2021.
